***Allowable Subject Matter***

This Office Action is in response to applicant's communication of 7/9/2009. Currently amended claims 1, 5-8, 11-12, 22-27 are pending and in condition for allowance.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed apparatus of a safety syringe and cap holding device with a disengagement means in the cap holding device for disengaging the at least a pair of opposing protrusions from engagement with the at least one recess of the hub by pulling the protrusion radially outwardly to detach the cap from the hub .

The closest prior art is Staebler (U.S. Patent 4,742,910), or Steiner et al. (U.S. Patent 4,955,865), but both fail to disclose the claimed combination with disengagement means by "pulling radially outwardly to detach" along with the other claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
